EDUCATION

Bachelor of Computer Science, Carleton University (Co-op) Expected June 2027

- Focus in applied machine learning and computer vision; available for a Fall 2026 co-op work term.
- Relevant coursework includes Algorithms, Database Systems, Operating Systems, Object-Oriented Software Engineering, and Programming Paradigms.

CERTIFICATIONS

- Machine Learning Specialization, DeepLearning.AI and Stanford University
- Microsoft Azure Machine Learning
- Google Cloud

TECHNICAL SKILLS

Languages | Python, SQL, JavaScript, C, Haskell, Java

Machine Learning and Data | Scikit-learn, Pandas, NumPy, OpenCV

Web and Databases | Flask, Node.js, PostgreSQL, HTML, CSS

Tools and Design | Git, Figma, Adobe Illustrator, Adobe Photoshop

PROJECTS

Interactive Portfolio Website (HTML, CSS, JavaScript, SVG) 2026

- Designed and built a portfolio site as a hand-drawn interactive SVG desk scene with no frameworks, where each object on the desk navigates to a section of the site.
- Implemented an animated camera zoom, parallax layers, a live clock, and full keyboard accessibility with reduced-motion support.
- Live at abdulsamadsanni.github.io with source published on GitHub.

Football Vision (Python, YOLO, OpenCV) 2026, in progress

- Building a computer vision system that detects and tracks players and the ball in match footage using YOLO object detection and OpenCV.
- Working toward team assignment, possession statistics, and automated tactical analysis from a single camera view.

World Cup Weather Analysis (Python, Pandas, REST APIs) 2026

- Investigated whether heat affects team performance by joining historical World Cup match data with weather records retrieved from the Open-Meteo API.
- Engineered heat-differential features, ran a fixed-effects regression pipeline, and presented results in an interactive SVG visualization.

Health and Fitness Club Management System (PostgreSQL, Flask, SQL) 2025

- Designed a relational schema and built a database-backed web application managing members, trainers, bookings, and billing for a fitness club.

EXPERIENCE

Cybersecurity Analyst Job Simulation, Mastercard (Forage) June 2024

- Completed the Mastercard cybersecurity virtual experience, analyzing suspicious emails to identify phishing attempts targeting internal teams.
- Evaluated which business areas showed elevated exposure and proposed targeted security awareness training to reduce risk.

Regalia Assistant, Carleton University Convocation, Ottawa, ON June 2026

- Supported graduate check-in and gown distribution during a high-volume, time-sensitive event week, coordinating with the ceremonies team to keep lines moving.

Event Staff, RBC Bluesfest, Ottawa, ON July 2026

- Assisted with festival operations and attendee support at one of the largest outdoor music festivals in Canada.
